

Viwinco Transitions to **Duralite** Spacer on **OceanView** Products

Viwinco is always striving to improve and innovate our products. Therefore, we are switching our **OceanView®** spacer to the **Duralite High-Performance Spacer by Quanex Building Products**. The Duralite spacer is a composite laminate design that optimizes the use of several spacer components that help ensure argon retention and moisture prevention.

Be worry free! Duralite is designed to seal your windows better and longer than other spacers, while increasing energy savings. These benefits help distinguish our **OceanView** product line as a **top choice in the impact-resistant window and door market**.

- **Automated Application** Applied using state-of-the-art automation technology featured on our new vertical Erdman glass line to ensure the perfect application, every time.
- **Durable and Long-Lasting** Duralite is built with cutting edge no-metal composite laminating technology, designed to perform and to endure.
- **Exceptional Performance** paired with our high-performing window systems to create products with superior energy efficiency.
